

Last Day of Class

Final Exam

- Either:
 - Saturday, Dec 8, 1-3:30 Spence Wilson Room (Briggs)
 - Wednesday, Dec 12, 1-3:30 Spence Wilson Room (Briggs)
- Test is designed for 2 hours, though you may use the full 2.5 hours.
- Cumulative (all class material is fair game), except graphics.
 - Slight emphasis on material since 2nd midterm (some stuff with strings, lists, 2d lists).
- You will be given copies of the string reference and list reference.
- Practice problems soon.
- Study old labs, programming projects, midterms.
- Biggest study suggestion: Do not just look at problems and their solutions. You must **do** the problems to learn.

Binary Numbers

What next?

- More CS: COMP 142 is the continuation of this class. COMP 172 & 231 are also required for the CS major/minor and can be taken directly after 141 if desired.
- Take these ideas and use them in practice!
- Stay in touch
 - Tell me when this class helps you out with something cool (seriously).
 - Ask me CS questions (may not always know the answer, but I can tell you where to find it).
 - Don't be a stranger: let me know how the rest of your time at Rhodes (and beyond!) goes: I really do like to know.
