Book:

Course Description:
This course is an in-depth study of the design and analysis of advanced algorithms, including the performance tradeoffs and resources required by various algorithmic implementations. Major classes of computational problems will be identified and explored. Advanced data structures and approximation heuristics are introduced as required for solution design. Topics will include the Master Theorem, dynamic programming, divide-and-conquer and greedy algorithms.

Workload:
- It is important to stay current with the material. You should be prepared to devote regular weekly hours to this course. Do not wait until the last minute to start your assignments.

Projects:
- Coursework will consist of 5-7 assignments involving both programming and written components. Programming will be in Python. You should be prepared to do regular work each week to keep up with the material and the assignments.
- Assignments should be submitted at the beginning of class on the day that they are due.
- You are allowed to use the course textbook and the course notes for these programs. The use of any other material to solve the problem sets is forbidden.
- Collaboration: You are expected to work individually on assigned problems. However, you are allowed and encouraged to discuss high-level details of the problems. If group work is allowed, it will be mentioned explicitly in the assignment.
Exams:

- There will be two midterms and one final exam:
  - Midterm 1: Friday, February 14, 2014, in class
  - Midterm 2: Wednesday, March 26, 2014, in class
  - Final Exam: Tuesday, April 29, 2014, 8:30-11am

Grade Breakdown:

- 50% Assignments
- 15% Midterm 1
- 15% Midterm 2
- 20% Final

Grade Assignments:

- Grading is based on the below scale:
  - A: [93%, 100%]
  - A-: [90%, 93%]
  - B+: [87%, 90%]
  - B: [83%, 87%]
  - B-: [80%, 83%]
  - C+: [77%, 80%]
  - C: [73%, 77%]
  - C-: [70%, 73%]
  - D+: [65%, 70%]
  - D: [60%, 65%]
  - F: [0%, 60%]

- For borderline cases, I may take into account participation, and/or attendance, and improvement during the semester.

Attendance:

- Attendance is expected for each class as material that is not covered in the book may appear in class. If your attendance deteriorates, you will be referred to the dean and asked to drop the course. Attendance and participation may also be considered when assigning a final grade.

Special Accommodations:

- If you are in need of special accommodations, please register with the Office of Student Disability Services x3885 as soon as possible so that all necessary arrangements can be made.

Scholastic Behavior:

- Plagiarism, cheating, and similar anti-intellectual behavior are serious violations of academic ethics and will be correspondingly penalized. If you are concerned about a possible violation of this kind, please talk with me. I understand the pressure that students may experience while at Rhodes, and I will try to help as best as I can.
